

Project proposal

Group number: 3

UMKC School of Computing and Engineering

Project title: UMKC International Students Guide.

Prepared by:

- Karthik Ponnuru
- Arunit Gupta
- Marmikkumar Patel
- Chaitanya Sai Manne

Project Goals and Objectives

Motivation:

Thousands of International Students enroll at UMKC for their schools every semester. As International students we faced couple of problems during initial days like pick-ups, accommodation, transportation, initial needs, culture shock etc. These problems lead us to create an application which helps future students.

Significance:

There are a couple of sources which exist but are not official. This application provides a wide range of information to guide the upcoming students.

The Objective:

To guide the International Students who travelled from different geographies to UMKC.

System Features:

1. Pickups
To provide pickups from airport to respective destination.
2. Temporary accommodation
Current Students can provide initial stay.
3. University Services
Information about fee payment, transportation to university, recreation facilities, Bank account opening and Student ID card.
4. Permanent accommodation.
To find permanent stay based on location, room size and sharing.
5. Post Arrival Information
Check-In sessions, e-campus tour and personal needs.
